**FOR BEST EFFECTS
PLANT
TULIPS
IN GROUPS
OR CLUMPS**

To obtain the greatest pleasure you've ever had from your Tulip planting, plant your bulbs in groups instead of single lines. Use only one variety in each group. Dig a hole large enough to accommodate five or ten bulbs in a group. Set the bulbs in it, spaced 4 to 5 inches apart, and replace the soil.

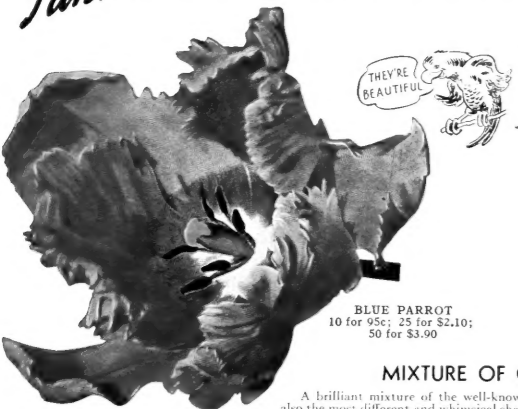

Rembrandt Tulips

Rightly named after the celebrated painter. Each flower in itself is a wonderful combination of colors. Every bloom is fantastically striped and feathered and beautifully flamed. There are many amazing color combinations and variations—flamed on white ground, gold on white ground, etc. Height 20 in. **Superfine Mixture.**

Fantastic PARROT TULIPS

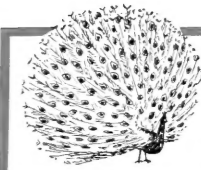

BLUE PARROT
10 for 95c; 25 for \$2.10;
50 for \$3.90

MIXTURE OF OLD PARROT TULIPS

A brilliant mixture of the well-known Parrot Tulips of old. Many different colors but also the most different and whimsical shapes. Their stems are shorter and less strong than the stems of the new Parrot varieties, but they are very suitable for cut flowers and are ideal for planting in the rock garden.

10 for 85c 25 for \$1.95 100 for \$7.20

**Exciting NEW
Peacock Tulips**

A new hybrid group with the peculiar characteristic of unfurling their blossoms full and wide, thereby revealing the magnificent color variations of the interiors in a manner similar to the peacock, which proudly displays its feathers. They display an amazing variety of different shades, and the foliage is always distinctly striped purple-brown, similar to the parent plant Greig. The flowers are long lasting, blooming continuously from the time of the early to the late-flowering Tulips. Heights vary from 8 to 18 in. Supply is still limited.
